Mons Chapter, I.O.D.E. Celebrates Empire Day

The May meeting of Mons Chapter, I.O.D.E. was held at the home of the secretary, Mrs. J. H. Lowrie on May 28th. Since this was Empire Day, it was fittingly celebrated by an interesting program arranged by Mrs. W. G. Evans.

The program, which opened with "The Maple Leaf For Ever" and closed with "O Canada," consisted of a charming solo by Miss Saugstad, two delightful patriotic readings by Miss Black, Mrs. McElroy, and an exceptionally well written paper on "The Empire" by Miss Wilson. This closed the recent campaign sponsored by the Daughters of the Empire throughout Canada for "Buy Made in Empire Goods," and Mons Chapter expressed its appreciation to those merchants who so kindly assisted by special decorations.

Westerda'e M.D. Sets Mill Rate at 7 Mills

The mill rate of the Westerda'e Municipal District was set at 7 mills at the last council meeting held last week.

The estimates for public works has not yet been completed and will not be finally made up until the council have made their annual inspection of the roads.

Shower Tendered Rev. & Mrs. Snyder

On Monday evening the congregation of the M.B.C. Church tendered Rev. V. K. Snyder and Mrs. Snyder a shower and welcome at the parsonage.

About ninety persons were present and enjoyed a short program of music and devotion.

After the parcels had been opened Mr. Snyder expressed his thanks to the congregation for their kindness. Refreshments of sandwiches, cake and ice cream concluded a very enjoyable evening.

WEEKLY JOKE

Haldy: "You spend altogether too much money."
Wife: "Not at all. The trouble is you don't make enough."

Sofball Club Reorganizes.

The Didsbury Softball Club was reorganized last Thursday night, when a large number of players turned out and signified a desire for the game. The treasurer's report showed a favorable balance, resulting in the fees for this year being reduced to 50 cents.

Enough players have signed up to form three teams, and it is expected that at least one more team will enter, as well as that from the High School.

Mayor Chambers was elected Hon. President, J. V. Berscht, President, Frank Kaufman, Vice-President and C. E. Reiber, Secretary-Treasurer. A membership committee of J. W. Hulton and Al. Russell was appointed to sign up all those desiring to play. R. Berscht, W. McFarquhar and W. Wynan were appointed a grounds committee.

Rev. & Mrs. Hallman Honored, Bible School

A very pleasant surprise gathering was held in honor of Rev. & Mrs. C. J. Hallman, at Mountain View Bible School, on the evening of May 27th.

In the presence of about 80 friends an interesting program consisting of songs and short addresses was given, the speakers representing the various departments of the church as follows: the Didsbury Class, Mr. Ezra Sherrick; the Board of Trustees, Mr. J. Adams; the Young People's Society, Mr. Emerson Shantz; the Bible School, Miss Louise Dagner; the Didsbury Congregation, Rev. A. Traub, all expressing appreciation of Rev. and Mrs. Hallman during the five and one half years of their pastorate here. At the close of the program the guests of honor were presented with two beautiful upholstered chairs as a token of appreciation. The pleasant evening closed with refreshments and a happy time of fellowship and good will prevailed.

WEEKLY SERMONETTE

Definition of a Christian: "One who can rejoice in the superiority of a rival."

Canadian Legion Field Day and Sports tomorrow (Friday).

LOCAL & GENERAL

Clint Reiber motored to Calgary on Tuesday.

June! the time to paint. See the Builders Hardware for special offer.

J. V. Berscht and Frank Kaufman were visitors to the southern city on Friday.

Mr. and Mrs. Jack Norton, of Calgary visited with Mr. and Mrs. W. G. Liesemer over the week-end.

It was reported that N. S. Clarke was cutting Alfalfa on Tuesday. This is the earliest we have heard of laying in this country.

Mr. J. F. Bell has moved his headquarters to W. H. Chamberlain's secondhand store, where they are now on exhibition.

Mr. Albert Sprague, who has been in the Peace River district for the last nine months, returned to his farm east of town Sunday last.

Mesdames Morgan, Adshad and Hillyard drove to Edmonton on Tuesday to attend the Grand Lodge of the Eastern Star.

The friends of Mr. Cecil Studer will be pleased to hear that he was successful in passing his intermediate exam. as a chartered accountant.

Alec Bogner, Henry Walder and Fred Folkman left Monday for Fort Assiniboine, where they have taken up homesteads.

Mr. W. D. Spence, of Edmonton, chairman of the Alberta Assessment Commission was in town Thursday and held a conference with the secretaries of the municipal districts.

Mr. and Mrs. Ross Marellus, Mr. and Mrs. Clarence Marellus, and Mr. and Mrs. Earl Marellus, all of Calgary, spent the week-end with Mr. and Mrs. Ed. Marellus.

The Didsbury Association Football Club will meet at the Pioneer Hotel Saturday night at 8:30 p.m. All members and those interested are urged to attend.

The stores will be open until 1 o'clock on Friday. They will be closed in the afternoon so the merchants can attend the Canadian Legion Field Day. The afternoon has been declared a civic holiday.

Geo. Arnold, who lives near Carline was sent up for trial by Magistrate Philipson Wednesday last on a charge of stealing a black mare and a grey colt, the property of E. S. Brower, of Harmanham.

A joint meeting of the three locals of the U.F.A. will be held in the Old United Church Building on Saturday, June 11th at 2 p.m. to complete the organization of the Co-operative Buying Association. All members and anyone interested are requested to be present.

The concluding meeting of the Business Girls' Bridge was held at the home of the Misses Nelda and Dorothy Hugel, Tuesday evening of last week. Honors for the year went to Misses Ruth Liesemer and Irene Grant; consolations to Misses Florence Reiber and Lucille Smith. Honors for the last meeting went to Miss Nellie Wilson.

Trout Fry Placed In Rearing Pond

Ten thousand trout fry have been put in the rearing ponds built by the Fish & Game Association on Bear Creek. The fry were a part of a big shipment which was being taken to Pigeon Lake from the Banff hatchery.

Two cans of fish were delivered by the midnight train Saturday morning and were met by George Julien and Hugh Lee, who immediately took them out to the pond.

Mr. Julien says they were in fine shape, there not being a dead one in the lot. The fish will be kept in the pools until fall, when they will be turned into the Fallen Timber. Great interest is being taken and the experiment will be closely watched during the summer.

Mr. Julien is also delighted to report that several Chinese Pheasants have been seen feeding near Mr. Dan Dippel's place. Pheasant-raising is another project being carried out by the local Fish & Game Association.

Boys Have Narrow Escape.

Milford and Gordon Greenman had a very narrow escape Friday morning when riding to school.

When near the Traub place the horse they were riding shied at a rock at the side of the road, and the truck coming from the south, driven by Guy Hamilton, of Olds, ran into them.

One of the boys was thrown onto the hood of the truck and put his arm through the windshield and the other boy fell on the road. The horse was dragged for about 30 feet before the truck could be brought to a standstill.

Fortunately the boys escaped with minor cuts and bruises, but the horse which was owned by Mr. Allen Hunsperger, had to be shot.

The driver claims he was only travelling at the rate of 20 miles an hour and tried to avoid the boys, but failed to do so.

BORN:

To Mr. and Mrs. Wm. Newton, on May 28th, a daughter.

Paint During June!

"Believe It or Not"

With apologies to Ripley

The Successful Farmer, from a stranger's viewpoint always has nicely painted buildings!

Buildings cost too much money to let depreciate through lack of paint. EVERY building should be painted at least EVERY FIVE YEARS! It pays to do this, not only from an attractive viewpoint but to preserve the building. When were your buildings last painted?

You Can Paint Cheaper Today than at any time during the past 15 Years. Both Material & Labor!

Let Us Quote on Your Paint!

During June Special Quotations will be given on House Paint or Barn Paint, Linseed Oil, Turpentine, Shingle Stain, White Lead, Etc., Etc.

You are under no obligation whatever in allowing us to figure your requirements. We know we can please the most particular paint prospect.

Fill in this Coupon and Send or Bring it to Us.

The Past, The Present and The Future.

Poets have written of "The past I leave behind"; men of affairs have stated the same thing; wayfaring youth promising to reform have made such declarations; all of us have been exhorted to "let the dead past bury its dead."

But can the past ever be left wholly behind? Does it not always intrude into the present and even project itself into the future? Is not the present made up largely of the accumulated experiences of the past, and will not the future be moulded in the experience of today? All history proves that this is so.

Furthermore, even if it were possible to leave the past behind, to wipe the whole slate clean and begin all over again as if what has gone before had never been, would it be a wise course of action? In some respects, perhaps, yes; in other respects most decidedly, no.

The past, it is true, is now only of value for the experiences it has provided, for the lessons it has taught, for the accumulations of wisdom it has thus stored up for our guidance, for the advances that have been made, and are now ours, in the onward and upward march of the race since prehistoric days. And it is because of these gains that it would be most unwise to completely blot out the past, even if we could.

Even the mistakes, the errors, the foolishness, the sins of the past should not be forgotten; they, too, have their value. They are the signposts along the road of the present, stretching on into the future, to warn us of dangers, to point out what to avoid.

But the past and its experiences, insofar as they resulted in discouragements and disappointments, weakening our wills, breaking our courage, lessening our initiative and energies, should be relegated to the limbo of the forgotten. They have no value, and constitute nothing but hampering drag-weights and throughout the days and years to come. They may well be wholly erased from our memories; left to the past to be forever buried by it and in it.

And the present? It is our only opportunity. We may have a future, and we may not; no one can tell. But we have the present; it is now ours to use or abuse. And we have the past to guide us in the manner and method of its use. And the future, if we are accorded one, will largely be what we make it by the use, or abuse, we make of the present.

Down through the ages our customs of life, our daily habits, our modes of thought and action, our institutions of government, our community existence, even our physical beings, have been developing and moulded to the forms of today. Man has profited by the lessons and experiences of the past, and he must continue in the present to profit, to learn, and to apply his learning to the problems of the present if his own future, and the future of his children and of the race, is to be better and brighter than is the present.

From the dark ages to the present, mankind and the world in which we live has progressed. At different stages progress has been achieved by great upheavals, by revolution, but it has been through the less spectacular, peaceful processes of evolution that the greatest upward strides have been made, those having the most far-reaching, most beneficial and lasting results for the betterment of all. This very fact, these experiences out of the past, have a lesson for the world of mankind today.

We have been suffering from an unrelenting business and economic depression. Times have been difficult and discouraging. Men and women in all countries and in all walks of life have been, and many still are, discouraged. Some are desperate, and talk revolution. But the past, if we will heed its warnings, teaches us that by revolution they suffered the most, whatever may have been the ultimately beneficial reforms which followed, while it has been by and through evolution that the greatest gains and blessings to the masses of the world's inhabitants have been secured.

In times like the present, men's views become distorted and their thinking unsound. This is but natural; it is indeed, human nature. They are prepared to go to extremes in the present without counting the cost of what the future will call upon them and their descendants to pay for the mistakes they may thereby make.

The present, therefore, is not a time for men to say: "The past I leave behind," except in the sense that they leave the errors and follies and unsound thinking of the past out of their reckoning and plans for the present and future. Rather it is a time to remember and closely study the past, the experiences of the past, and the results which flowed from those experiences, with a view and a determination to profit thereby, rejecting what time and experience has proven to be bad, and incorporating, extending, strengthening those ideas and principles which have revealed their soundness into the warp and woof of the future.

Growing Their Own

Gardeners in Ireland are using the hot springs for horticultural purposes with such good results that they claim that Ireland need import no more foreign vegetables; they can grow sufficient to supply the whole island. The planters are starting a campaign with the slogan: "Buy Irish produce."

Nowadays people not only refuse to give credit where credit is due, but they won't give credit where cash is due either.

Showed Great Vitality

Remarkable vitality was shown by a hen that was buried under a heap of garden and path clippings at Glenmalur North, New Zealand, for twenty-four days. A neighbor heard it cawing and found it after investigation. It was weak and emaciated, but made a good recovery.

Psychologists find, in tests, that stimulating effects of caffeine in coffee and other beverages become less as the user grows accustomed to the drink.

Her Heart Was So Bad Couldn't Do Housework

Mrs. S. Druggan, R.R. 2, Midland, Ont., writes: "I had been troubled with heart trouble for many years. My heart would beat so fast I could hardly breathe, and I had headaches, and dizzy and fainting spells. I couldn't get my housework done I was so weak. I took three boxes of Milburn's Heart and Nerve Pills and felt much better, and now I would not be without them in the house."

Price 50c a box

Sold at all drug and grocery stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

New Thieving Plan

Scotland Yard Looking For Gang Robbing Letter Boxes

A gang specializing in a combination of thieving and forging are occupying the attention of Scotland Yard. In search of letters containing checks, they raid public and private letter-boxes, using typewriter as bait. Much of this work must prove futile, unless they have inside information or work at mission times, such as the first of the month.

Forgery of the postmarked checks is a specialized job which can be detected only by the use of ultra-violet rays and the aid of a handwriting expert. The gang's methods are so characteristic that they offer to Scotland Yard a ready means of identifying their handiwork.

If Edgar Wallace were still alive, a new book or play featuring these novel exploits might be expected in a few weeks—or even days.

Acids In Stomach Cause Indigestion

Create Stomach Discomfort, How To Treat

Medical authorities state that nearly three-fourths of the cases of indigestion, flatulence, belching, heartburn, gas, bloating, nausea, etc., are due to excess of gastric acids. The acids in the stomach, causing the burning, irritating, distressing, delayed and slow action, causing the disagreeable symptoms which every stomach sufferer knows so well.

Artificial digestions are not needed in such cases and may do real harm. By laying aside all digestive aids and instead get from our digestive system the natural power to deal with the acids, the stomach, prevents the formation of excess acids. There is no sourness, gas or pain. Bismuth Magnesia (in powder or liquid form) is the most efficient form of treatment for stomach disorders. It is used by thousands of people who enjoy their meals with no sense of indigestion.

Isabella Horses Are Scarce

Special Breed Can Be Obtained Only In Germany

Isabella horses are being sought in Germany by Captain Hopkins, regarded as one of the best judges of horses in India. At the behest of a Maharajah, they are a special breed with brownish yellow bodies and white manes and tails. They are wanted to draw the Maharajah's state coaches. Horses of this type used to be bred throughout Europe by various princes, the studs of the Kings of Hanover in Herrensberg, being specially noted for them, but now so far as is known they are only bred by one private dealer in Germany.

Persian Balm, the one toilet requisite for civility, women delight in to use. Leaves no stickiness. Swiftly absorbed by the tissues. Delicately fragrant. Imparts a velvety softness to the complexion. Tones up the skin. Soothes and banishes all unpleasant roughness or chafing caused by wind and other weather conditions. Makes hands soft and white. Creates an elusive, essentially feminine charm. Persian Balm is indispensable to women of refinement.

Origin Of Sandwich

It seems that the spirit of the age is against tea. "I wouldn't dream of taking up time and space with all the paraphernalia of a tea table," says a very French business man. He usually plays bridge and a stop for tea would be a nuisance. So we are back again at the days when our Lord Sandwich, too busy with gambling to bother about lunch, invented the snack which bears his name.

Asthma Is Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Though you do know, however, from experience how immeasurable is the relief provided by that marvelous invention, Dr. J. J. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer, don't delay a day in securing this remedy from your druggist.

Larger Greenhouse Area

Glass used in the greenhouses and hothouses on Vancouver Island and the Lower Mainland, British Columbia, covers an area of approximately four million square feet, an increase of over 200 per cent in the past eight years.

The North Pole is not by any means "the coldest thing in the universe." Liquid hydrogen has a temperature of 422 degrees below zero.

W. N. U. 1942

Eno keeps you Clean Inwardly

It's far more important to clean the inside than the outside of a milk bottle. For the same reason, clean intestines are far more important than clean face and hands. Nothing will cleanse your intestines better than ENO'S "Fruit Salt." Take it regularly, morning or night. Be ENO conscious!

C.W.I.

ENO'S "FRUIT SALT"

A Promising Sign

Many New Manufacturing Industries Are Starting In Britain

Students of the British industrial situation are pointing out that the returns from the Patent Office indicate an increased tendency to protect in Great Britain the production of commodities which heretofore have been largely supplied from foreign countries.

It is of great interest to note, in this connection, that there have been many applications for patents for silk manufacture, hitherto largely controlled by France; for laundry machines, up to now regarded as an exclusive American monopoly; and for dye and alloy manufactures, of which Germany has been the principal originator in the past.

In all these varying fields, new industries have sprung up in the Old Country, and so far as dyes and alloys are concerned, the manufacture is now predominantly British, while silks and other products are being manufactured in Britain in ever-increasing volume. At a time when business is supposed to be going to the bow-wows, surely this is a promising sign.

Miller's Worm Powders not only make the infantile system untenable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

Radio In Dummy Funnel

This Innovation Will Be Seen On New British Liner

A dummy funnel will be used to house the wireless equipment of the White Star liner "Georgic" which is rapidly nearing completion at Belfast. The aerial and direction finder both will be inside the giant funnel, and thus screened effectively from local electrical disturbances. The top of the funnel will be open, and with the aerial fitted on the roof of a cabin inside it will be possible to obtain uninterrupted wireless signals for direction finding. The screening will be so complete, in fact, that the usual work of eliminating electrical interference from the ship's motors will be unnecessary.

Like her sister ship the "Britannic," the "Georgic" will have two huge elliptical funnels, but as she is a motor vessel, only one is needed as an exhaust and ventilator.

Fliver Derails Freight Train

Knocks Eight Freight Cars Off the Track at Level Crossing

They tell of a mouse falling into a rum barrel and crawling out crying for lions to fight.

Recently at a level crossing near Greenhurst, Ont., a "Fliver" derailed a Canadian National Railway freight train and derailed eight cars. It charged, screaming and died screaming, a total wreck, but in its mad agonies it guarded its owner-driver, T. E. Callon, Orlin, and another passenger, William McEwen, both of whom escaped with minor bruises. None of the train crew was injured.

Why suffer needlessly? Douglas's Epsom Salts relieve aches, pains, relief to acid feet, sore corns and warts. Relieves inflammation. Moves proud flesh.

Trapper Meets Tragic End

Perishes From Cold In Shack In Northern Woods As Result Of Accident

Solution of a five-month mystery and the end of a Royal Canadian Mounted Police search came recently with the arrival at The Pas of a Mountie patrol under Constable W. Barret, bringing the body of Oscar Morrell, missing trapper, from one of his trapline shacks 34 miles east of Mile 374 on the Hudson Bay Railway line.

Morrell left Mile 374 on Christmas Eve last, planning to be gone two weeks on a hunting trip. It is believed while covering his trapline he accidentally discharged his rifle and blew off his right hand. Driving his team of dogs, he staggered through the snow to one of his trapline shacks, where he made a rude and futile effort to stop the flow of blood from his injured arm. As he weakened rapidly he built up the fire in the shack to keep out the freezing winds, using chairs, part of his bed, and even his snow-shoes in his effort to keep warm.

When friends here became alarmed at his long absence, a detachment of Mounties set out to search for him, and broke into his shack to find his body in the grim setting of his lonely struggle against death. His body was brought to The Pas for identification and burial. He is believed to have lived in Winnipeg and Saskatchewan before coming north to trap.

No Wood Is Sound

The wildest and loudest kind of wood is not really solid at all. It is full of air, twenty to forty per cent of its total bulk consists of gases, trapped in the minute tubes and cell cavities that all wood is made of. This appears from the researches of Dr. D. T. MacDougal, of the Carnegie Institution of Washington, who reported them.

Economic Organization Within The British Empire Is Urged For Boosting Inter-Empire Trade

Formation of a permanent economic organization within the British Empire and elimination of party politics from imperial trade conferences were urged by Hon. Frank Carroll, prominent Quebec publisher, as steps toward restoring inter-empire trade. The proposed permanent economic organization should be similar to the League of Nations, Mr. Carroll said in his address to the Canadian Club and Colony Board of Trade members.

The speaker believed one important result of the coming Ottawa Imperial conference would be the organization of such an economic body as he suggested. This body would "technically, scientifically, and economically find the solution to many problems now engendered all the peoples of the empire." Prominent Englishmen were rapidly becoming converted to the idea, he continued, and sympathy was growing stronger throughout the empire.

Mr. Carroll's plan also included an empire educational campaign through the press, pictures and radio; founding of an empire commercial university; assistance in the promotion of British branch factories; co-ordination of trade agencies and consular services; construction of empire warehouses in leading industrial centres; speedy by creation of free ports; interchange of business data through-out the empire; uniform cable codes; and, finally, offering favorable treaties with world trading states.

Great Bear Lake Minerals

Many Claims Have Already Been Staked and Great Activity Shown

According to reports reaching Ottawa, a great many mineral claims have already been staked in the area adjacent to Great Bear Lake, North West Territories, and there is every likelihood that many more will be staked this summer. Some prospectors have already gone in by aeroplane and others are planning to go in by water transport as soon as the ice goes out. In view of this great activity the Topographical Survey, Department of the Interior, Ottawa, has reprinted the manual respecting the survey of mineral claims in Dominion lands for the use of Dominion land surveyors who may be called upon to make official surveys of these claims.

U.S. Wheat Exports

Made International Gain in March Over Recent Months

Wheat exports of the United States made a substantial gain in March over recent months. The index was 79, as compared with 73 in February and 74 in January. A year ago it was 53. All other export groups, however, fell off sharply.

All principal European countries except Italy took more wheat in March than a year ago. Total exports thus for this season amounted to 106,908,000 bushels against 102,309,000 a year ago.

"Are you going to take this lying down?" boomed the candidate. "Of course not," said a voice from the rear of the hall, the shorthand reporter are doing that."

"When is high tide, captain?" "At 5:55 p.m. But I have told you twice already." "But your chin suggests so comical. When you say 5:55," Hummel, Hamburg.

W. N. U. 1942

Bees Are Preparing For Season's Work

Abundant Food and Protection From Cold Essential To Strong Colonies
During the winter months there is little or no activity within a bee colony, for during the cold weather the only matter of concern to the bees is to secure enough food and to keep warm.

Sometime last fall the queen ceased her egg-laying, and as the combs became empty of brood they were filled with food for the winter. As the weather became cold the bees gradually clustered closer and closer, around their queen until finally a fairly compact cluster was formed, and, except during an occasional spell of warm weather, this cluster may remain unbroken for a period of five or six months.

During the winter, the cluster moves about within the hive at all times keeping in contact with the food supply. Towards spring an unknown something will inform the bees that summertime is again on its way and the cluster will gradually loosen and expand and in the centre of the cluster the queen will again resume her work of egg laying. Only a few eggs are laid at the start, but as the days lengthen and the sun becomes stronger, the number gradually increases until as high as 2,500 may be deposited daily.

In outdoor wintered colonies, egg-laying usually commences some time during the month of March, depending greatly upon the weather. In some localities such activity may be resumed even earlier. Cells wintered bees do not usually start so early as outdoor wintered bees, except under abnormal conditions. This early egg-laying is of great importance to the beekeeper, for it is the eggs laid during the spring and early summer that will produce the bees to gather the honey harvest. The larger the force of field bees at the commencement of the harvest, the greater will be the crop, and it follows that the greater the number of eggs laid during the early part of the season, the larger will be the field force. To get the maximum number of eggs laid, three things are necessary. A vigorous and prolific queen; an abundant food supply, and adequate protection from cold and changeable weather. Neglect to supply any one of the three will result either in starvation and death of the colonies or in colonies that are too weak in bees to gather a surplus of nectar when the honey flow is on.

Telegraph wires in East Africa have to be carried on exceptionally high poles owing to the liability of gnats breaking the cables.

434

SMALL DAUGHTER FOLLOWS SUITE IN SUMMER DRESS
MUMMY IS WEARING

Add this new guinea dress to small daughter's wardrobe—both you and she will love it!

The clever design of this model has taken yellow swiss with white dots for the blouse. Plain linen in French blue made the skirt and suspender straps. It's a most pleasing combination.

Of course all sorts of attractive summery materials could be used for this charming model. Tomato-red pique with white dimity with tiny pin red dots is very effective. Navy blue sheer wool swiss with the guinea of red and white checked gingham is quaint and extremely fashionable.

Style No. 434 is designed for sizes 6, 8, 10 and 12 years. Size 10 requires 1 1/2 yards of 35-inch material for blouse and 1 1/4 yards of 39-inch material for skirt and trim.

Price of pattern 25 cents in stamps or coin (note is preferred.) Wrap coin carefully.

Schools Need Freedom

England Taking Advantage Of New Idea Of Education

English education is very much alive. There are still dull patches in it, of course; but, go where you will, you are never far from a school which is showing strong power of adaptation to the new needs of the community.

Three times before in history English education has flushed with renewed energy; first under Alfred, next at the time of the Reformation, and last in the early days of Queen Victoria. But never till now has it been free from the cramping influences of poverty. Today it is well furnished and free in its choice of methods of work. The teachers are at liberty to try new ways of teaching; to get into the open air to use other tools than the pen. A school needs space, zest and freedom if it is rightly to train those who a few years hence will make or mar the tone and temper of town and village, of factory, shop and farm. Not all the schools have yet made full use of their new opportunities. But England is now dotted over with good examples of the new education.

Seed Oats From Alberta

Further Supply Has Been Ordered For Saskatchewan Areas

Further shipments of seed oats will be made from Alberta to the drought-stricken areas of Saskatchewan, according to G. M. Stewart, district inspector of the Dominion seed branch in Calgary.

Some time ago one million bushels of seed oats were shipped from the Peace River area to Saskatchewan. The further shipments will be made from other parts of Alberta into the surplus supply of seed oats in the Peace River country has been used.

Mr. Stewart said a request has been received from Saskatchewan authorities for additional supplies of seed oats. The previous shipments having been insufficient.

Will Not Need Fire

Civilization Of Future Will No Doubt Have Substitute

The prediction that fire, which has played so strategic and friendly a role in man's progress, will be needless in future civilization was made by Dr. Walter Hough, chief curator of anthropology of the U.S. National Museum. Dr. Hough based his prophecy that we shall become independent of fire upon the ground that other natural forces will be utilized. The germ of this future phase of civilization is already developing in modern invention, Dr. Hough said.

Canada will have a nationally-owned radio broadcasting system if the report tabled in the House of Commons is implemented by parliament.

Highlights of the report are:

Establishment of a chain of high-power national stations located at suitable intervals across Canada, their exact position to be determined after a careful technical survey.

Appointment of a federal commissioner of three, with assistant commissioners for each province, "to carry on the business of broadcasting."

Establishment of trans-Canada chain broadcasting as "one of the first duties" of the commission.

Advertising to be limited to not more than five per cent. of each program period.

Location, where required and under private ownership if desired, of as many stations of 100 watts or under as may be deemed necessary for complete coverage.

All revenues from license fees and advertising to be expended in the interests of radio, and license fees to be paid by the governor-in-council.

The report, which was brief and left the working out of details to the commission, pays tribute to the present radio broadcasting stations in the following words:

"They entered as pioneers in a field of service in the art of radio, under trying handicaps and sacrifices, worthily kept pace with a science fraught with ever-changing improvements and developments, and rendered this service under handicaps, which is most praiseworthy."

The committee expressed the belief, however, "that the present system, excellent as it is in certain respects, does not meet the requirements in quality and scope of broadcasting to insure its maximum benefits."

The report, presented by Hon. Dr. Raymond Morand (Cons., Essex East), bears the endorsement of the entire committee of nine members.

Saving Canada's Antelope

Interesting Chapter In The Story Of Wild Life Conservation

The history of Nemiskam National Park, Alberta, Canada, is an interesting chapter in the story of wild life conservation. Overcoming what appeared to be insurmountable difficulties, forty-two antelope were enclosed in a fenced-in area in southwestern Alberta in 1915, and, in contrast to previous experiments, continued to thrive in captivity. Their welfare and propagation, which at first was a matter of speculation, now seem to be definitely assured, as officials of the National Parks of Canada, Department of the Interior, report that the herd now totals 425.

Record For Inventions

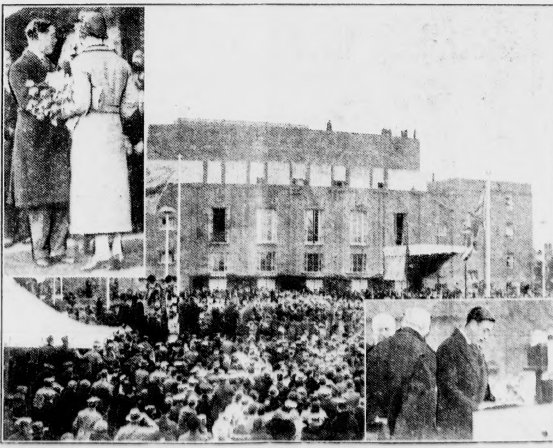

The Wall Street Journal says: "Depression as well as necessity, may lay claim to being the parent of invention, for within the last six months the number of inventions patented or awaiting patent papers is greater than in any similar period on record in this country. It seems that unemployed men are using their enforced leisure to perfect mechanical devices of all sorts."

The oldest oak forest in Europe is standing in Oldenburg, North Germany. The trees date back to the Middle Ages.

"Master, I've found lion tracks in the north!" "Good, let us go south immediately," Hummel, Hamburg.

THE GREAT DAY AT STRATFORD-ON-AVON

These pictures give a few glimpses of the ceremonies which marked the opening of the Shakespeare Memorial Theatre at Stratford-on-Avon, England. The main photograph shows part of the huge crowd gathered in front of the new theatre while inset (top left) the Prince of Wales is introduced to Miss Elizabeth Scott, the architect. Lower right, His Royal Highness can be seen making his speech at the opening of the Memorial Theatre.

Care of the Caragana Hedge.

Adaptation and use of common Caragana (arborescens) for hedges and related purposes in the prairie provinces are forcefully demonstrated by the fact that over 50 tons of seed were collected and sold in 1931. Enquiries concerning the care of this hedge prompts a summary of the most important facts.

While Caragana can be started in a permanent location from seed and thinned to the required distance, it is preferable to start with young trees. A summerfallow strip, wide enough for some form of cultivation is preferable. Seedlings should be set about a foot apart and planted in early spring. A single row is preferred. It is advisable to set them a little deeper when transplanting. In order to encourage a bushy growth, one-year-old trees can be cut back to within an inch or two of the surface; cut back to almost a foot in length the second season, and trimming to the desired shape can start the third year.

After a Caragana hedge has been established, trimming is necessary every year. At the Dominion Experimental Station, Scott, Caragana hedges are trimmed during the last week of June. After that date there is sufficient growth to cover up the wounds. Their appearance can be better maintained by trimming off irregular growths a few weeks later.

Just what permanent shape should be maintained is a matter of taste. A rectangular-shaped hedge lacks the gracefulness of one that incorporates gentle curves. It is preferable from a standpoint of balanced appearance to have the width maintained, or slightly increased at the base. A rounded surface at the top offers a pleasing appearance. Future width should be borne in mind, so that it is often necessary to trim back to the old wood every year.

G. D. MATTHEWS,
Dominion Experimental Station,
Scott, Sask.

Believes In Advertising.

"I am a great believer in newspaper advertising and I think it has never been more valuable than at the present time," said John P. Patterson, president and general manager of Norris-Patterson, Ltd., Toronto, in an interview with the Herald a few days ago. The merchant or manufacturer who desired to gain an advantageous position in the business revival, which was even now apparent, must plan a system of advertising, he declared.

Mr. Patterson is visiting all large western centres on his way to the Rotary International Convention at Seattle.

LOCAL & GENERAL

Paint your house and outbuildings! The Builders Hardware will show you how cheap you can do it.

There will be service at Bethel Evangelical Church, Westcott on Sunday afternoon at 2 o'clock.

What shall we do Saturday night? Why, dance at the Opera House. It's only 25c. and good music too.

Mrs. J. A. McGhee is attending the Eastern Star convention at Edmonton this week.

Mrs. Harold G. Reiber, of Berkeley, California, is visiting in Didsbury for a few days.

Extra good quality large size writing pads (100 sheets) for sale at Pioneer Office—25 cents each.

The Annual Church Meeting of Zion Evangelical Church will be held in the church Thursday evening at 8 o'clock.

We have a fresh supply of scratch pads now ready. Especially useful for school, store or telephone. 2 for 5 cents.—Pioneer Office.

St. Cyprian's Anglican Church: Major W. T. H. Cripps, Rural Dean will be the preacher Sunday evening at 7.30.

"The Man Who Played God," featuring George Arliss, is being screened at the Opera House tonight (Thursday).

The subject of the sermon at Zion Evangelical Church Sunday morning will be: "Systematic Giving" and in the evening: "Our Motive for Giving."

Joan Crawford in "Dance Fools, Dance!" America's dancing daughter in her most thrilling picture will be presented at the Opera House on Monday and Thursday of next week.

The Didsbury Local U.F.A. sponsored Miss Marion Johnston to a week's course in domestic science at the University of Alberta. She commences her course on June 2nd.

The W.C.T.U. will meet at the home of Mrs. I. Burkholder on Thursday, June 9th, at 3 o'clock. Mrs. Madoche will be in charge of an interesting program which will include the display of the essay and poster work taken up recently in grades V to VIII. Come and bring a friend.

A factory representative of "61" Enamel is offering to finish any small piece of furniture free at the Builders Hardware on Saturday, June 11th. You purchase the enamel and he will do the rest. They are asking that you take your piece of furniture to the store before June 11th, as he will only be at the store one day. See their advertisement.

HAIL INSURANCE

In order to provide Hail Insurance at the lowest possible rates, all hail insurance policies this season will contain a deductible clause. The effect of the deductible clause is to eliminate small losses which do not affect grain growers seriously, but which add considerably to the cost of insurance.

The 10 per cent deductible clause provides that the Assured shall bear the first 10 per cent. Example: If the crops were damaged 100 per cent the amount paid would be 100 per cent less 10 per cent equals 90 per cent. If the crops were damaged 50 per cent the amount paid would be 50 per cent less 10 per cent equals 40 per cent. If in such a case another storm should occur causing a further damage no deduction would be made from the second loss and the full amount of the further damage would be paid.

The 25 per cent deductible clause operates exactly the same as the 10 per cent deductible clause except that the amount deducted is 25 per cent. Example: If the crops were damaged 100 per cent the amount paid would be 100 per cent less 25 per cent equals 75 per cent. If the crops were damaged 50 per cent the amount paid would be 50 per cent less 25 per cent equals 25 per cent.

ITEMS OF INTEREST

Great Britain is at present laying more bacon from Canada than from the U.S. A report issued by the Dominion Bureau of Statistics recently shows that imports into Great Britain from Canada, not including hams, in the first four months of this year totalled 5,727,500 lbs. In 1930 the imports were 3,713,500 lbs, but they dropped to 493,500 lbs in the same period of 1931. In the first four months of 1930 British imports from the U.S. amounted to 25,811,000 lbs. This dropped in the same period of 1931 to 8,925,900 lbs. and in 1932 to 2,569,700 lbs.

The opening of fishing for speckled trout in the Malaga-Medicine Lake waters of Jasper National Park June 1st attracted many notable anglers, among whom were Courtney Riley Cooper, angler and outdoor writer, R. R. (Hob) Davis, of the New York Sun and Ivan Cobb, of magazine fame. Gene Tunney, world's heavyweight champion is planning to fish in these waters during the season. Transportation service between Jasper Park Lodge and Medicine and Malaga Lakes has been arranged and accommodation in established chalets will be augmented by floored tents to care for the members of the angling fraternity.

Announcement is made of special low-rate fares good from noon June 2nd until the following Monday, on the railways for the King's Birthday holiday. In order to give Canadians a chance of enjoying the long week-end which this holiday, falling on a Friday permits, arrangements having been made to provide return tickets at one-and-a-quarter times the first-class one-way fare, between all points in Canada and to U.S. border points. The going portions of these special tickets will be good from noon on Thursday, June 2nd to noon on Sunday, June 5th, and the return portion good until Monday, June 6th.

Best Crop Prospect for Years.

Practically All Wheat Seeding Complete in Alberta;
Moisture Good.

With practically all wheat seeding completed and excellent moisture conditions prevailing in almost every district in the province, Alberta is facing more encouraging crop prospects than has been the case for some years, says the fortnightly crop report of the department of agriculture.

Since the last report was issued, the weather has furnished good growing conditions, with warm days interspersed with rains varying in degree, but being more or less general throughout the province. There have been cold nights, with slight frosts in several districts, damping things, however, but tenderer plants. Practically every district has a generous supply of moisture. In the central and northern districts wheat seeding is also about completed and seeding of oats and barley far advanced, save in the districts east of Edmonton along the National lines, where conditions have been somewhat more backward. Vermillion district reports heavy rains which broke a somewhat dry spell.

Peace River territory reports all seeding practically complete, except some of the coarse grain acreage and greentree, with many fields showing green and grass making fast growth. Over the entire province pastures are making splendid progress and feed conditions promise well.

Some districts report damage by cutworms, but continued rains are expected to act as a deterrent to this pest.

Butter and Beef

Stocks are Low

"It is to be noted that creamery butter stocks on April 1st were below the five-year average for this date," says the weekly bulletin of the Co-operation and Markets branch of the provincial government. "Beef stocks on the other hand are lower than a year ago, but little over half the five-year average supply."

"No embarrassing surplus stands in the way of an appreciation in butter prices," is the comment of Harvey G. Powell, general manager of the Dominion Agricultural Credit Company Limited.

Matron, Wood's Home Real Mother to Charges

Most mothers find their hands full with one or two active young sons and daughters, but Mrs. Annie Wood, matron of Wood's Christian Home, goes serenely about her task of "mothering" nearly 100 youngsters. Hanging in age from about five to fifteen, the children have innumerable wants that must be attended to daily, but Mrs. Wood manages to find time for them all. She is a real mother to these little ones who have no mothers of their own, and there is always loving sympathy for any child committed to her care. She superintends the mending of their clothes, supervises their diet and straightens out their dilemmas. The Wood's Home is a home indeed and much of the happy atmosphere existing there is due to the matron's unceasing vigilance and love for her small charges.

Forty British sportsmen will make up five parties which have arranged to fish trout and salmon on the Miramichi River, N.B., during 1932, according to announcement by the provincial director of information and tourist travel.

Canada shipped more than 5,000,000 pairs of rubber and rubber-soled boots and shoes valued at approximately \$4,405,100 to more than 80 countries during 1931, according to information given out by the Dominion Department of Trade and Commerce.

Travelling Canadian Pacific across the Dominion from Detroit and visiting Niagara Falls, Toronto, Ottawa, Montreal and Saint John prior to sailing by S.S. Melita for their home countries, eight European Ford Motor dealers were lavishly entertained at all cities they stopped at.

S.S. Montclare, the ship that inaugurated Canadian Pacific ocean passenger service at Halifax this winter after a lapse of twenty years, saluted the port with a shrill blast of her whistle Good Friday evening when she ended her last visit to Maritime ports for the 1931-1932 season.

Scotland will send an official Trade Mission ship to Canada this spring with a view to developing closer business relations with the Dominion. Over a hundred Scottish firms already hooked space on the ship which has been fitted out for the purpose by the Corporation of Glasgow.

LOST 30 lbs. FAT IN 3 MONTHS

AT THE AGE OF 40

"I was very stout, and I have taken Kreschen Salts for 2 1/2 months, and have reduced from 212 lbs. to 182 lbs. (age 40). I am a hearty eater, and have never dieted in any way. Also I have never felt any ill effects whilst I have been taking Kreschen Salts." T. H.

"That is an instance of Kreschen Salts reducing without assistance. But if any fat person will be satisfied with a moderate diet, and will take one half teaspoon of Kreschen Salts in a glass of hot water before breakfast every morning—they can lose fat in just the same way.

"This is what Kreschen Salts does—it cleans out the impurities in your blood by keeping the bowels, kidneys and liver in splendid working shape, and fills you with vigor and thrills energy you almost forgot had existed—you get the needed exercise. As a result, instead of planting yourself in an easy chair every few moments and letting fatty fat accumulate, you feel an urge for activity that keeps you moving around doing the things you've always wanted to do and need to do to keep you in good condition.

THE HOUSE OF DREAMS-COME-TRUE

—BY—

MARGARET FEDLER

Author of
"The Splendid Folly," "The Hermit
Of Red Bay,"
Fiedler & Soughton, Ltd., London.

CHAPTER XXI. Continued.

"Beg pardon, my lady," he said, touching his hat. "Sir Adrian sent me to say that he's waiting for you at the car just along the road there." He pointed to where, on the white ribbon of road which crossed the Moor not far from the base of the tower, a stationary car was visible.

Claire, her face ashen, turned to Nick in mute appeal.

"Sir Adrian? I thought he left for London this morning?"

Nick shot the question fiercely at the chauffeur, but the man's face remained respectfully blank.

"No, sir, Sir Adrian drove as far as Foston and then returned. Afterwards we drove on here, sir, and they told us in the village we should find us at Shelston Torrs."

Meanwhile the other members of the party were becoming aware that some contretemps had occurred. Claire's white, stricken face was evidence enough that something was amiss, and simultaneously Lady Anne and Jean hurried forward, filled with apprehension.

"What is it, Claire?" asked Lady Anne, suspecting had news of some kind.

"What has happened?"

Recognizing the Charwood livery, she turned to the chauffeur and continued quickly: "Has Sir Adrian met with an accident?" She could con-

ceive of no other cause for the man's unexpected appearance.

"No, my lady. Sir Adrian is waiting in the car for her ladyship."

"Waiting in the car?" repeated Jean and Lady Anne in chorus.

The little group of friends drew closer together.

"Don't you see what it means?" broke out Claire in a low voice of intense anger. "It's been all a trick—Adrian never meant to go to London at all. He only pretended to me that he was going, so that I should think that I was free and he could trap me." She looked at Nick and Jean significantly. "He must have overheard us—that day in the shrubbery at Charwood—you remember?" They both nodded. "And then planned to humiliate me in front of half the county."

"But you won't go back with him?" exclaimed Nick, hotly. He swung round and addressed the chauffeur sternly. "You can damn well tell your master that her ladyship will return this evening with the rest of the party."

The man's face twitched. As far as it is possible for a well-dressed servant's face to express the human emotion of compassion, his did so.

"It would be no good, sir," he said in a low voice. "He means her ladyship to come. 'Go and fetch her away, Langton,' was his actual words to me. I didn't want the job, sir, but you may guess."

"Well, she's not coming, that's all," declared Nick determinedly.

"Oh, I must, Nick—I must go," cried Claire in distress. "I—I don't stay."

Lady Anne nodded.

"Yes, I think she must go, Nick dear," she said persuasively. "It would be wiser."

"But it's damnable!" ejaculated Nick furiously. "It's only done to insult her, to humiliate her!"

Claire smiled a little wistfully.

"I ought to be used to that by now," she said a trifle shakily. "But Lady Anne is right—I must go."

She turned to the chauffeur, dismissing him with a little air of dignity that, in the circumstances, was without its flavor of heroism. "You can go on ahead, Langton, and tell Sir Adrian that I am coming."

The man touched his hat and moved off obediently.

"Nick and I will walk down to the car with you," said Lady Anne. She was fully alive to the fact that her escort might contribute towards ameliorating the cold of reception Claire would obtain from her husband. "Jean dear, look after everybody for me for a few minutes, will you?" And, raising her voice a little, she explained that Claire has been called home suddenly, as Sir Adrian was not well enough to make the journey to town after all."

But Lady Anne's well-meant endeavor to throw dust in the eyes of the rest of the party was of no avail. Claire was a remarkably little one. Although to many of them Claire was personally an entire stranger—since Sir Adrian intervened whenever possible to prevent her from forming new friendships—the story of her unhappy married life was practically public property in the neighborhood, and it was quite evident that to all intents and purposes the detestable husband had actually insisted on her returning with him, exactly as a naughty child might be swept off home by an irate parent in the middle of a jolly party.

It was impossible to stem the flood of gossip, and though most of it was kindly enough, and wholeheartedly sympathetic to Lady Latimer, Jean's cheeks burned with indignation that Claire's dignity should be thus cut ragged.

The remainder of the afternoon was spent for her, and Nick's stormy face when he, together with Lady Anne, rejoined the rest of the party did not help to lighten her mood.

"You are sorry, Nick," she whispered compassionately, when presently the opportunity of a few words alone with him occurred.

He glared at her.

"Are you?" he said shortly. "I'm not. I think I'm glad. This ends it. No woman can be expected to put up with public humiliation of that sort."

"Nick!" There was a sharp note of fear in Jean's voice. "Nick, what do you mean? What are you going to do?"

There was an ugly expression on the handsome boy's-looking face.

"You'll know soon enough," was all

Best oil cheapest in home, says factory supt.

"The last thing I'd want to recommend on," says the superintendent of a large eastern factory, "is lubricating oil. By using cheap oil we could save hundreds of dollars each year but it would cost us thousands of dollars for repairs, replacements and lessened efficiency of equipment."

The same is true in the home. If all housewives knew what factory men know about lubrication, few of them would use anything but 3-in-One Oil for their expensive sewing machines, vacuum cleaners, electric fans, lawn mowers, washers, and other household devices. 3-in-One, a blend of mineral, vegetable and animal oils, is the best oil for household use, for it cleans and protects as well as lubricates.

Ask for the old reliable 3-in-One Oil at good grocery, hardware, department and general stores. For your protection, look for the trade mark "3-in-One" printed in Red on every package.

he vouchsafed. And swung away from her.

Jean felt troubled. She had never seen Nick before with that set, still look on his face—a kind of bitter concentration which reminded her forcibly of his brother's. He rather dreaded what it might portend.

Her thoughts were still occupied with the afternoon's unpleasant episode, and with the possible consequences which might ensue, as she climbed into Burke's high dog-cart.

She had had a feeling notion of claiming Claire's vacant seat for the handmaiden run, but had dismissed it since actually Claire's absence merely served to provide comfortable room for Blaise in the Wilton Ferry car, which had held its full complement of passengers on the outward journey. Moreover, she reflected that any change of plan, now that she had agreed to drive back with Burke, might only lead to trouble. He was not in a mood to brook being thwarted.

A big, raking chestnut, on wires to be off, danced between the shafts of the dog-cart, irritably paving the ground and jerking her handsome, button-downed head up and down with a restless jingle of bit and curb-chain. She showed considerably more of the white of a wicked-looking eye than was altogether reassuring as she fought impatiently against the compulsion of the steady hand which gripped the reins and kept her, against her will, at a standstill.

The instant she felt Jean's light foot on the step her excitement rose to fever heat. Surely this must mean that at last a start was imminent and that that firm, masterful pressure on the bit would be released!

But Burke had leaned forward to tuck the light dust-rug round Jean's knees, and regarding this further delay as beyond bearing the chestnut crowded a diversion by going straight up in the air and protruding gaily on her hind legs.

"Steady now!" Burke's calm tones fell rebukingly on the quivering, sensitive ears, and when came two shining hoofs in response, as the man condensed in the next moment a move mental rest. The next moment she was off at a swinging trot, heaving every now and again, out of pure exuberance of spirits, into a cauter, strongly repressed by those dominating hands whose quiet mastery seemed conveyed along the reins as an electric current is carried by a wire.

"You needn't be afraid," remarked Burke. "She'll settle down in a few minutes. It's only a little start, nothing to be afraid of. There's not an ounce of vice in her composition."

"I'm not afraid," replied Jean composedly.

How Air Films Are Made

Handicaps Have Been Overcome By Use of Motor Driven Cameras

Film stories of aviation present more handicaps during production than almost any other type of screen fare, according to Stephen Roberts. Mr. Roberts is the wartime aviator and former stunt flier who went to Hollywood to direct "Sky Bride."

"The one reason aviation movement fails to furnish thrills and interest is because of the plane's lack of background," he said on his return. "In playing action against a blank, even a clouded sky, it is difficult to convey a sense of speed."

"With the cameras on the ground, the airplanes usually are so distant that the speed is lost on the screen. With the cameras in a balloon or on a high tower, the range of their activity is limited. With the cameras in other planes, both camera-ship and the plane being photographed must travel at relatively the same speed to allow filming of close shots, and once more all sense of speed is lost."

"Electrically controlled cameras are the way we succeed in capturing effective scenes in the air. We attach these motor-driven cameras to the rim of the cockpits, pointing backward, right into the flier's face."

"We rehearse the scenes on the ground, then send the boys up alone. When the right altitude is reached, the actors press a switch and the camera starts grinding while the actor plays the scene himself, without direction."

Little Help For This Week

"Bear ye one another's burdens, and so fulfill the law of Christ."—Galatians vi. 2.

What is the real good? I asked in musical mood. Order, said the law-court; Knowledge, said the school; Truth, said the wise man; Pleasure said the fool; Love, said the maiden; Beauty, said the page; Freedom, said the dreamer; Home, said the sage; Equity, said the seer; Spake my heart full sadly. "The answer is not here," Then within my bosom, Softly this I heard, "Each heart holds the secret, Kindness is the word."

John Boyle O'Reilly.

But now God has so ordained it that we should learn to bear one another's burdens, for there is no one who has no some defect, no one without some burden, no one independent of others, no one wise enough of himself; but we ought to bear with one another, comfort one another, help, instruct, and advise one another.

—Thomas A. Kempis.

For Scalds Or Burns.—Dr. Thomas' Electric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinary's fee.

Canada's Arctic Citizens

Over 7,000 Eskimos Living In Our Northern Hinterland

There are approximately 7,000 Eskimos in Arctic and sub-Arctic Canada, including Hudson Bay, scattered in small groups, principally in the Arctic Islands and along the northern sea-board. Canadian Eskimos are progressive. The more advanced have, in their houses, sewing machines, gramophones and radio sets. In the Mackenzie delta and along the western Arctic coast the ambition of the head of a family is to own a schooner fitted with an auxiliary gasoline engine. At Alkyak during the summer as many as twenty-five of these schooners, all owned by natives, are frequently to be seen at one time.

As a veritable an excellent preparation for the Northern (Great Northern) Estimator. It has saved the lives of countless children.

Hawaii has a new biscuit and bread plant which cost half a million dollars.

The Chinese government has placed an order for freight cars in Scotland.

Nervous Indigestion

Troubled for Years, Mrs. John Machone Thanks Dr. Williams' Pink Pills for Permanent Relief

Soon Saw A Great Change

"For many years I had been troubled with indigestion and my nerves," writes Mrs. John Machone, "I cannot quite say I suffered constantly, but without gaining any relief, was unable to get any rest. I got a box of Dr. Williams' Pink Pills to give them a trial. I soon saw a great change. Now I can go to bed and have a good night's rest, and am able to do a day's work with any one. All I have to thank for it is Dr. Williams' Pink Pills. I would not be without them in the house."

Dr. Williams' Pink Pills are remarkably effective in cases like the above, because they create the rich blood which supplies to the nerves the very elements they need. Equally effective in rheumatism, neuritis, and anemic conditions. Try them at your druggist's. 50c a package.

To Bring Back Prosperity

Only Way Is By Harder Work and Better Work

If we allow ourselves to believe that some intangible, mysterious force called "recovery" is going to improve our lot without any assistance from ourselves we will soon lose the trenches we have gained. The last three years have chastened the instinct for laziness which is one of our racial characteristics. The last three years has driven the well-dressed idler into work or obscurity. The last three years has forced us to place sport and recreation generally in their proper relation to the stubborn realities of life. We cannot afford to abandon the stern discipline we have learned. Harder work and better work is the only way to reach the promised land of prosperity. By the sweat of our brow alone will good times come again.—Daily Express, London, England.

Czechoslovakia may boost its beer tax.

DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and to wash

MUCH PREFER APPLEFORD WONDER PAPER

With so much invasive thought being given to eliminating unnecessary work, it is only natural that a worthwhile substitute for the dusty dust cloth should be sought.

Now it has been found! Appleford Wonder Paper which actually dries, as it cleans (as it polishes) a reflecting surface, welcome Canadian women who clean dust cloths and all they stand for. Wonder Paper is made from clean rags and soft paper pulp, thoroughly impregnated with a high grade furniture polish, and absorbs dirt instead of spreading it. Appleford Wonder Paper comes in many sizes, package, twenty-five sheets, each as large as a doily. You merely crumple a sheet into a soft ball, and go over the surfaces requiring attention.

You'll be amazed at the quick and lasting finish Wonder Paper gives. When one size is worn and soiled, simply tear the Wonder Paper inside out. After the finished work has been done, when over, you can still use your Wonder Paper on the floor.

And when it is through—clean it away. No dust to shake out or wash. No bother at all. The most obvious part of housework done in half the time and with half the effort. Doesn't the idea appeal to you?

Special Offer

Wonder Paper is made by the makers of the famous "Klean-Bus" heavy duty paper for the Green Bus. It is made of hardware and department stores sell Appleford Wonder Paper. If you wish to purchase it direct, write to us for a new and unique booklet entitled "Wonder Paper and your household chores" at a bonus for your trouble.

Appleford Paper Products, Ltd., Hamilton, Ont.

Softball League Formed.

Softball is apparently going to be the premier sport in the district this summer. A league comprising of country and town teams was formed at a meeting held on Saturday evening.

The league will be known as the Berscht's Softball Competition, and all league games will be played in Didsbury. Mr. J. V. Berscht is donating the prizes, the 1st prize being a Forsyth Country Club shirt for each player on the winning team. The 2nd prize will be Holoport Autogart socks for each player.

Ten teams are expected to comprise the league, the following teams already having entered: Elkton, Rosebud, Clovermont, West Didsbury, High School and three Didsbury town teams.

The following officers of the league were elected at the meeting: President, Mr. F. Kaufman; secretary, Mr. Ward Keith; executive, Messrs. Irwin Klein, O. Folkman and Ezra Dippel.

Softball.

WASHOUTS vs. TERRORS.

On Friday night Wyman's Washouts from the north end of town tangled with Berscht's Terrors from the south and after a wild and hectic battle emerged victorious by a score of 14-9.

Young Holub on the mound for the Washouts pitched a fine game for seven innings, when he was replaced by Larry Leavens, who was slightly erratic, but managed to pull out of a couple of bad holes safely. For the winners Bill McFarquhar was the bright light, his brilliant fielding and work with the hickory being a revelation to the fans.

Len. Berscht went the route for the Terrors, but had much difficulty with his control. Alberta Pacific Woodcock caught a good game, but it was left to young Evans in left field to provide the sensations for his team. Evans made a number of very pretty catches.

Washouts: Wyman, Holub, Frey, Russell, Hunt, Halton, Leavens, McFarquhar, McKenzie-Grievens.

Terrors: L. Berscht, Woodcock, Meston, C. Geiger, G. Geiger, G. Hawkes, Keith, Halliday, Evans.

BACHELORS vs. HENPECKS

A terrible melee occurred Monday evening at the ball diamond, when Russell Berscht's "Bachelors" locked horns with Jim Halton's "Henpecks."

The game developed into a free hitting contest, when both teams agreed to change pitchers every inning. Henpecks got away to a good lead for three innings, but weakened slightly in the fourth. Dr. Evans courted round the third sack like a two-year-old and was easily the pick of the Henpecks, with "Jayvee" Berscht a close second for honorary mention. Duke Keats Keith was always on the job and Harry Gabel turned in a good game behind the bat.

Lorne Frey, of Shaven & Shinen's,

was the heavy slugger for the Bachelors, with Rastus Reiber providing the sensations in the field.

Umpire Frank Hesleton had a tough time on his hands keeping order.

The final score (heartily disputed by the Henpecks) was 33-25 in favor of the Bachelors.

Henpecks: Doc. Liesemer, Dave Edwards, Cliff. Bellamy, Harry Gabel, Ward Keith, Jim Halton, Jim Calhoun, Doc. Evans and J. V. Berscht.

Bachelors: Meston, Wyman, Frey, Leavens, McFarquhar, R. Berscht, Reiber and Russell.

"The Vanishing Legion."

Nat Levine, president of Mascot Pictures Corporation offers a real all-star cast in "The Vanishing Legion," his latest all-talking serial, which will be shown for the first time locally at the Opera House on Friday evening next. Harry Carey, veteran of action melodramas, and Edwin Booth, one of the screen's youngest beauties, who played the leading roles in "Trader Horn," make their serial debut in this picture.

Rex, King of Wild Horses, who has been starred in several feature attractions is featured in the supporting cast. Frankie Darrow, another feature player is also a newcomer to serials. In addition to these well-known stars the cast includes several stars who have been specializing in serials and action dramas, among them being William Desmond, Philo McCullough, John Bonomo and Yakima Canutt.

The story of this new serial which was written especially for the stars by Wyndham Gittens and Ford Beebe is laid in the oil country of the West and concerns a mysterious, seemingly supernatural menace that brings disaster to all who attempt to work a certain oilfield. The story moves rapidly through a series of startling climaxes that bring each chapter to a close.

Installments of "The Vanishing Legion" will be screened at the Opera House for the next twelve weeks every Monday and Thursday, commencing Monday evening next.
